# AMPLETECH REFRESH ITAD SERVICES

### CERTIFICATE OF RECYCLING

AmpleTech Refresh will provide a Certificate of Recycling for all material processed at out facility. This guarantees that your equipment was handled in the most environmentally compliant manner relieving you of any liabilities.

### LOGISTICAL PLANNING

The AmpleTech Refresh Team will work with our clients to plan, implement, and deliver the most efficient and cost effective method to remove your electronics and meet your data security needs.

### ELECTRONIC RECYCLING

AmpleTech Refresh provides an environmentally sound solution for the final disposition and recycling of obsolete/non viable assets. Guided by the principles of our certifications, we fully vet our downstream partners ensuring that all assets and components generated through our processes are handled properly.

### DEINSTALATION OF ASSETS

Once your new IT assets arrive, the old assets need to be taken offline from the corporate infrastructure. This is an involved activity with a technical, step-by-step process. Each data-bearing device will be completely uninstalled, stripped of its network access and then inventoried.

### ASSET REMARKETING

Once inventorying, testing, and data security are complete, AmpleTech Refresh will evaluate the assets for possible resale. Our network of buyers enables us to maximize the return for clients who are interested in selling assets. The revenue generated can be utilized to reduce/offset fees generated during the ITAD process.

### ON SITE HARD DRIVE SHREDDING

AmpleTech Refresh can provide onsite hard drive destruction services utilizing our trucks equipped with shredders. Our trained technicians will inventory each drive prior to shredding for proper asset tracking and security.

### DATA DESTRUCTION

This is the most crucial step in the ITAD process. Every data-bearing device-from PCs and tablets to printers and fax machines-must have its data wiped. Whether this data removal process takes place onsite or at the AmpleTech Refresh facility, it is imperative to have the right processes in place. With our certifications and advanced data security procedures, AmpleTech Refresh takes responsibility for proper data destruction.

### INVENTORY & TESTING

At the client's request, AmpleTech Refresh will provide an itemized listing of all the equipment that is received. The information provided will include the serial number, product type, manufacturer, model and asset number, as well as final disposition.
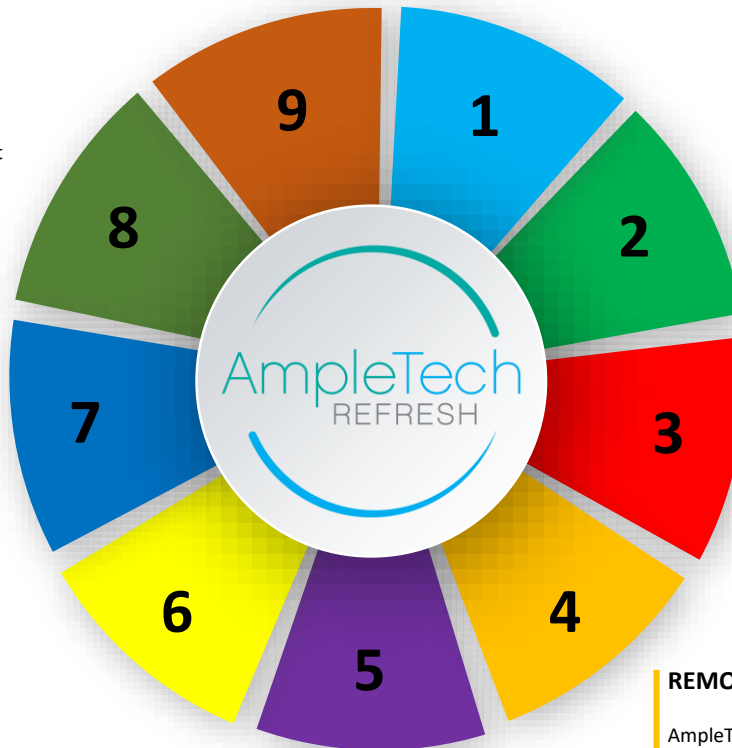

### REMOVAL SERVICE

AmpleTech Refresh can plan and provide the packaging, removal and transportation of large or small quantities of materials utilizing our fleet of trucks national shipping partners. Whether it is before, during, or after hours, we provide flexible scheduling to meet our clients specific needs.
